

History of Elections for Fire and EMS Services

Most fire agencies, especially fire districts and regional fire authorities, place regular measures on the ballot to secure and increase their funding for fire services. Cities that provide fire services don't seem to do this as regularly as fire districts. *The information below is from Municipal Research and Services Center (MRSC).*

Local Ballot Measure Database

Municipal Research and Services Center (MRSC) has created a Local Ballot Measure Database that tracks how city, county, and special purpose district ballot measures have fared in Washington State since November 2011, including the jurisdiction, date, statutory authority, voter approval percentage, and summary of each measure.

The results in this database are unofficial and are for research purposes only. Please note that MRSC does not track school district ballot measures. Many local ballot measures only require a simple majority (50% plus one) with no minimum voter turnout. However, bond measures and certain other voted revenue sources require a 60% supermajority and may also require minimum validation (voter turnout) requirements. While MRSC does its best to accurately reflect this information in the database, MRSC does not track voter turnout and cannot guarantee that ballot measures requiring validation have met their minimum voter turnout requirements.

For official vote tallies, check with the local county auditor's office. However, it is up to each taxing district (and not the county auditor's office or MRSC) to determine whether any given ballot measure passed.

How Often are the Results Updated? MRSC updates the database a few weeks after every special, primary, and general election, as soon as possible after the results are certified by the counties. **The database is current through the August 2021 primary election.**

Results Summary

Statewide, there were 2,133 Ballot measures by city, county and special districts in the past ten years. Overall, 77% of these measures passed. Statewide, there were 614 Ballot measures that had the word "Fire" in them, and of these 84% passed. There are also several ballot measures with "EMS" and these are often included in "Fire" ballot measures.

In King County, there were 208 Ballot measures by city, county and special districts in the past ten years. Overall, 69% of these measures passed. In King County, there were 72 Ballot measures that had the word "Fire" in them, and of these 82% passed.

For measures that didn't pass the first time, many jurisdictions often placed another similar measure on the ballot on an upcoming election, which more often did pass the second time.

MRSC Local Ballot Measure Database from November 2011 to August 2021 for city, county and special districts
